

Cobalt Foods — Sustainability Report 2025

Cobalt Foods is a plant-based packaged-goods manufacturer headquartered in Minneapolis, Minnesota. This report summarises environmental performance across water use, packaging emissions for the 2025 fiscal year.

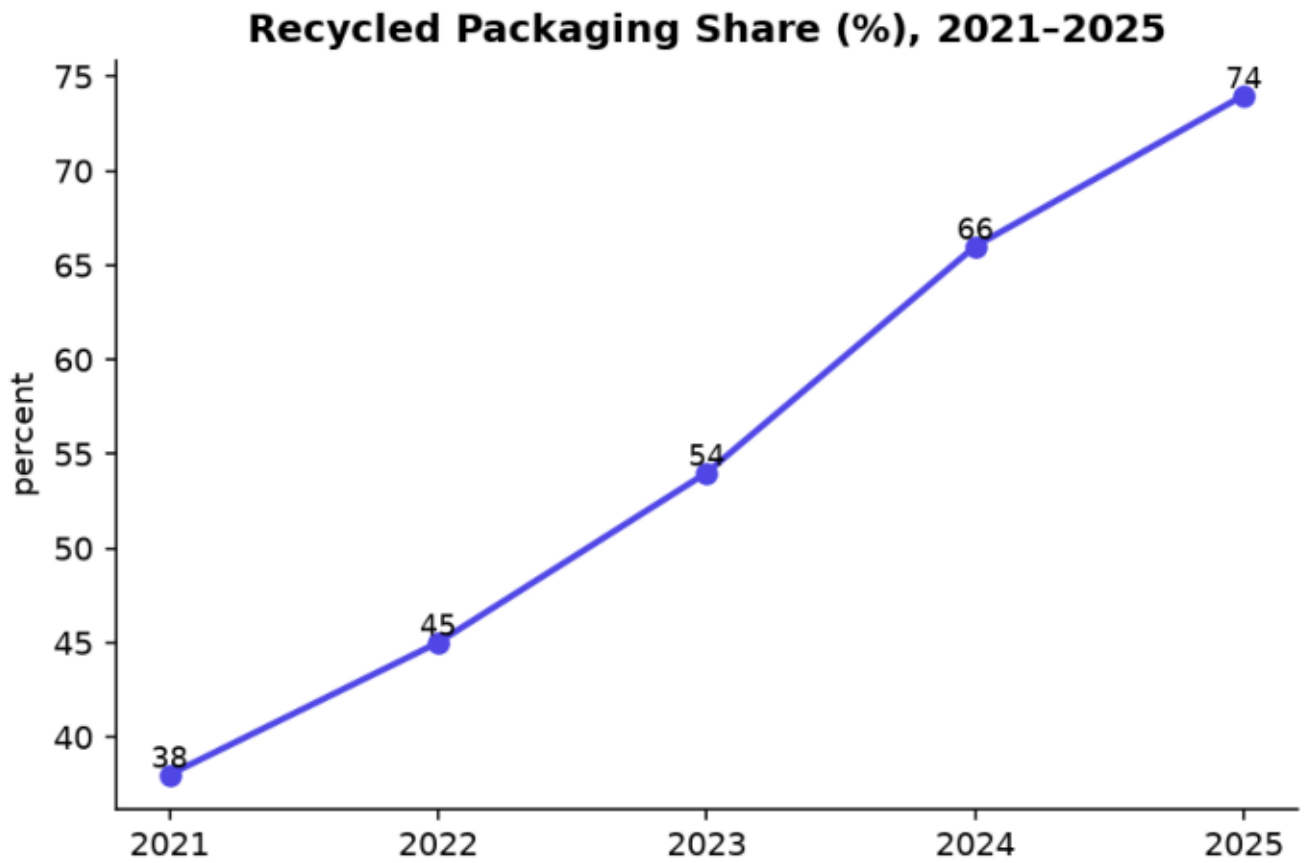

Targets are measured against a 2020 baseline. The company continued to shift toward recycled packaging and renewable process heat.

Water Use Intensity by Plant (litres per unit)

Water intensity differs by plant age and product mix, with the newest facility performing best.

Recycled Packaging Share (%), 2021-2025

Recycled content rose steadily as suppliers were requalified.

Scope Emissions Summary (tonnes CO2e)

Scope Emissions Summary (tonnes CO2e)

Scope	2024	2025
Scope 1	18,200	16,400
Scope 2	24,900	21,100
Scope 3	96,500	91,800

Emissions fell across all scopes year over year, led by renewable electricity procurement.
