

Helios Energy — SunCore 480 Solar Panel Datasheet

The Helios SunCore 480 is a monocrystalline solar panel designed for commercial rooftop installations. Helios Energy is headquartered in Fremont, California, and manufactures modules with a 25-year warranty.

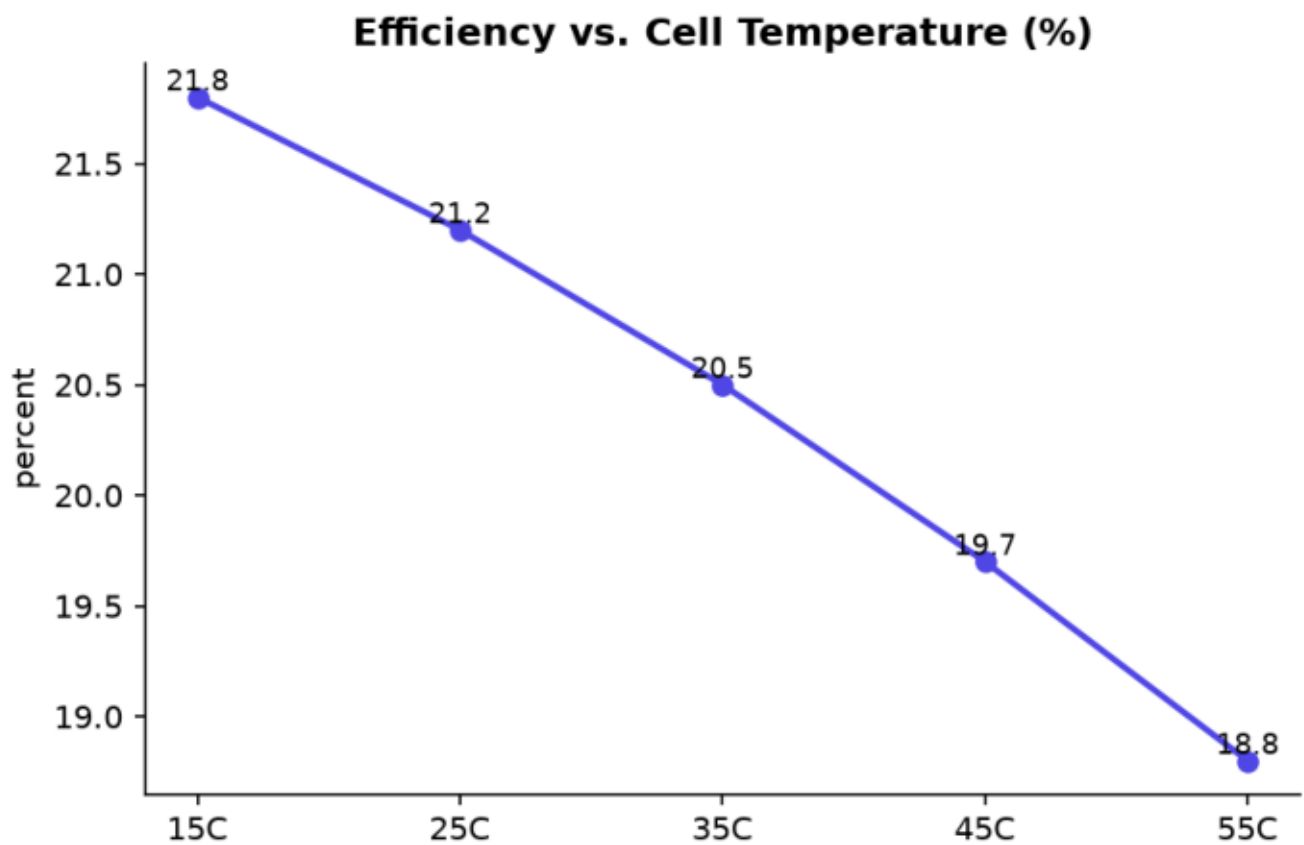

This datasheet lists measured electrical and thermal characteristics. Values were captured under standard test conditions unless noted otherwise.

Rated Power Output by Model (watts)

The product line spans entry to high-output modules for varied roof areas.

Efficiency vs. Cell Temperature (%)

Efficiency declines gradually as cell temperature rises, consistent with the module's temperature coefficient.

Electrical Characteristics (SunCore 480)

Electrical Characteristics (SunCore 480)

Parameter	Value	Unit
Open-circuit voltage	49.6	V
Short-circuit current	11.8	A
Max power voltage	41.2	V
Max power current	11.2	A

Characteristics are specified at standard test conditions of 1000 W/m² and 25C cell temperature.
