

Vertex Mobility — Investor Update 2025

Vertex Mobility designs electric delivery vans for urban logistics fleets. The company is based in Portland, Oregon, and went public in 2023. This update covers deliveries, range performance and order backlog.

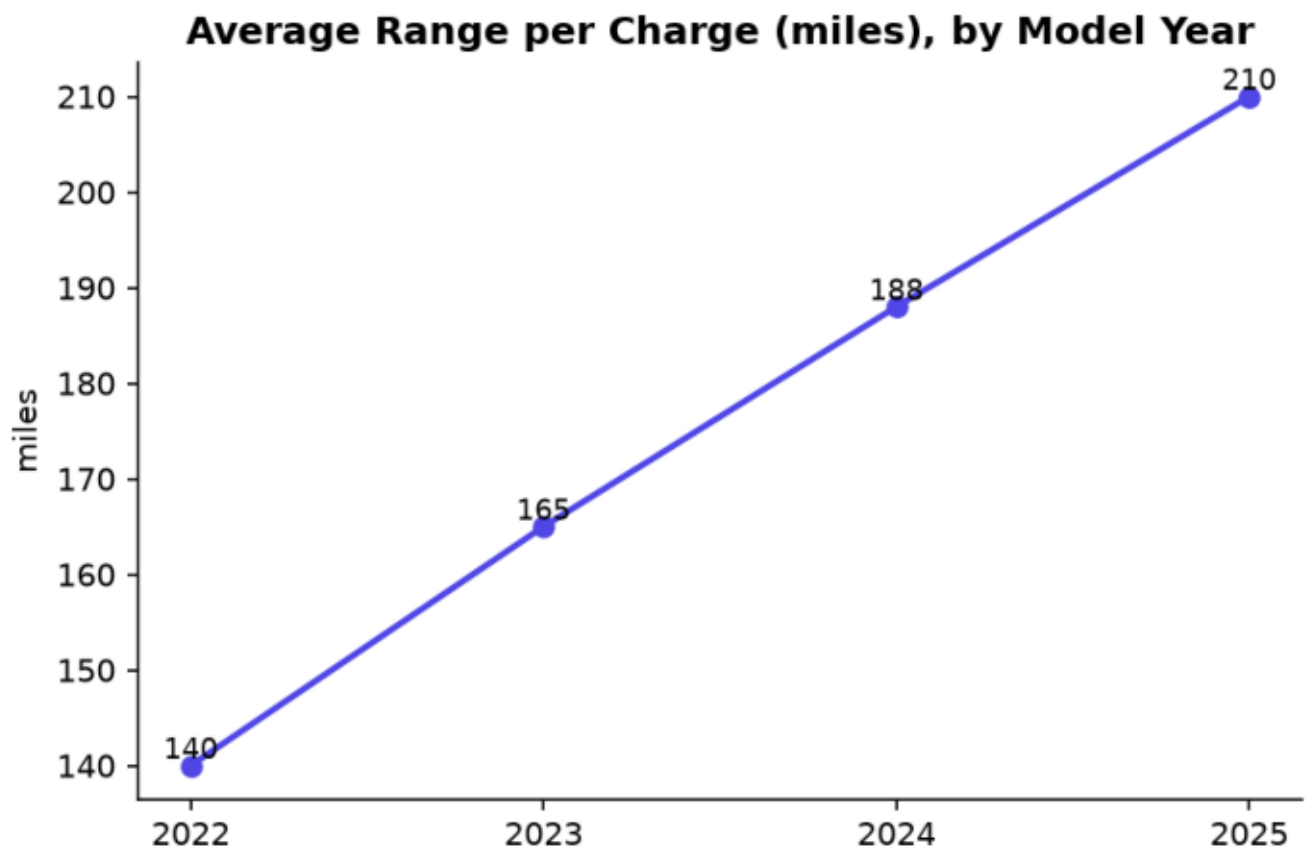

Management reiterated its focus on manufacturing yield and on expanding the charging-pa network in target metros.

Vehicles Delivered by Quarter, 2025

Deliveries accelerated through the year as the second assembly line reached full rate.

Average Range per Charge (miles), by Model Year

Range improved with each model year through battery and aerodynamic refinements.

Order Backlog by Segment (2025)

Order Backlog by Segment (2025)

Segment	Units	Avg. price (USD)
Parcel	5,400	48,000
Grocery	3,100	52,000
Municipal	1,800	61,000

Backlog mix skews toward parcel fleets, with municipal orders carrying the highest average price.
